Lab Task 6b

Write the followings:

class BasicCalc
+double abstract add( )   +double abstract subtract( )   +double abstract multiply( )   +double abstract divide( )

class MyBasicCalculator
#double value1   #double value2   #double result
+MyBasicCalculator( )   +MyBasicCalculator(double v1, double v2)   + double Value1   + double Value2
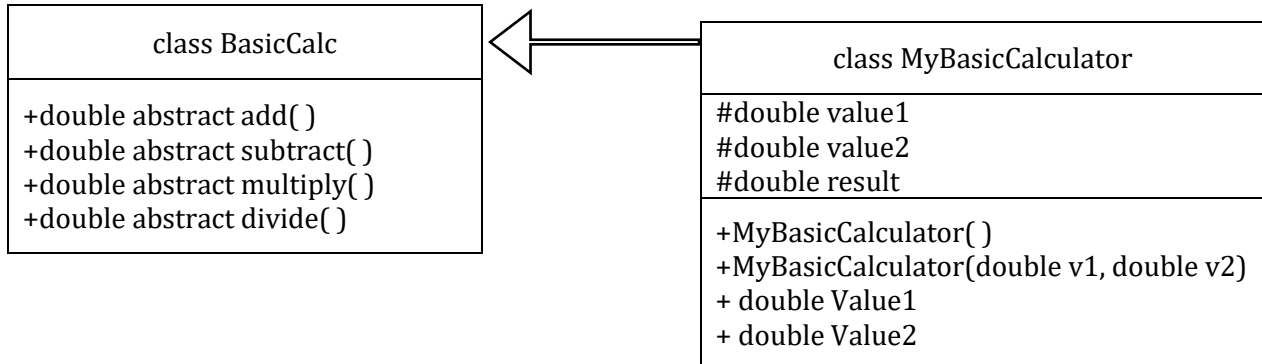

Write another class **Program** that contains Main( ). Inside Main create two objects of MyBasicCalculator and illustrate the purpose of all the methods and constructors.
